

MicroLite8™ Laser Safety Eyewear

Maximum Protection, Comfort and Function

The #1 choice during laser procedures:

- Saphenous Ablations
- Intense Pulse Light
- Hair Removal
- Spider Veins

- Multi-wavelength filter lenses with very high light transmission qualities for Alexandrite Diode, YAG, Holmium and CO₂ lasers.
- Exclusive MicroLite8 frame architecture: 8-Base lens curve for maximum field of vision and clarity at all angles.
- Superior filter lenses that transmit more visible light, for better clarity during high precision laser procedures.

Additional MicroLite8 Laser Safety Eyewear Features

- Maximum nanometer (nm) wavelength protection ranges with the highest visible light transmission.
- Available in Silver, Midnight Blue, and "Fit Over" frame styles.
- Widest range of prescriptions available, with fastest Rx turnaround in the industry.
- One year warranty from date of sale.

Accessory bonus: protective case, microfiber bag, anti-fog lens cleaning solution, adjustable ClickFit™ retaining cord

Exclusive!
MicroLite KG5, BG38 and Fit Over Filter Lens Technology

- Unsurpassed optical clarity.
- Provides ultimate contrast and visual detail in the procedure room.
- The lightest weight lenses available anywhere.

AttenuTech is the only company that designs and manufactures eyewear specifically for your protection in laser diode environments. All AttenuTech® MicroLite® Series laser safety eyewear is prescriptionable by design. Our in-house lab will process and ship your single vision or bifocal prescription faster than anyone in the industry.
